Nguyễn Gia Bảo

Software Engineer / Fullstack Developer

0394742067 giabaobs35@gmail.com https://www.facebook.com/ng.gia.baoooo/ Hanoi

CAREER OBJECTIVE

As a highly motivated Fresher Fullstack Developer, my objective is to leverage my solid foundation in web development (React, Node.js) and database management to build high-performance, user-centric applications. I am eager to join a professional environment where I can contribute to impactful projects, quickly adapt to new technologies, and continuously advance my technical expertise to become a Senior Software Engineer.

EDUCATION

FPT University 9/2022 - 9/2026)

Software Engineering

Currently completing my graduation thesis. Actively involved and playing a core role in practical capstone projects (SWP391, PRM393, PMG201c). Notably, one of my team's projects was ranked in the top 30% of outstanding university projects and was awarded a research and development grant of 50,000,000 VND.

WORK EXPERIENCE / KEY PROJECTS

Fsoft (FPT Software) 5/2025 - 8/2025

Intern .NET

Acquired fundamental skills and deep knowledge related to the .NET framework.
Familiarized with the enterprise software development lifecycle and professional coding standards

FPT University 9/2025 - 4/2026

SkillMatch - AI-Integrated Recruitment Platform

Fullstack Developer & UI Designer
Tech Stack: React, Node.js, MongoDB.
Developed a full-stack platform featuring an AI-driven candidate skill assessment and an anti-cheating monitoring system.
Designed modern UI/UX and optimized frontend performance (removed blur effects for faster rendering). Built the database architecture and integrated the PayOS payment gateway.
